

Envelope Effect with Text in CorelDraw

1. Create some text, either a few words fairly big, or a paragraph of smaller text
2. Click on the **Text** menu, and select **Fit text to frame**
3. Resize the textbox so it just fits the text
4. Select the Pick tool and right click the text
5. Click **Convert to Artistic Text**
6. Click **Effects > Envelope**
7. On the Envelope Docker, click **Add New**; the mouse pointer changes

p. 141, 178

You should now be able to grab the nodes and reshape the box around the text; the text will change with the shape of the box. You can also add nodes and convert lines to curves or straight segments, much like with the bezier tool.

Envelope on a single word

A whole paragraph
